

SPB Top Entry Terminal Box

SA4959-100-01 - Terminal Box

Top Entry Terminal Box with Fixing Bracket

Top Entry Terminal Box Attached to SPB Unit

The SPB Top Entry Terminal Box is the latest product to compliment the highly successful SPB range of collector column / slip ring units. Primarily used in the wastewater sewage treatment industry, the top entry terminal box minimises installation time and use of exterior electricians. The unit can also be pre-wired to customer specification.

Features:

- > Utilises catenary method of holding cables
- > Totally sealed unit
- > Rugged stainless steel construction with stainless steel bracket
- > Easy access via single insulated inspection panel c/w gaskets
- > Can be pre-wired to customer specification from terminal box to slip ring
- > Can have Din rail mounted terminals to customer specification
- > Compact unit dimensions, Height 435mm, Width 360mm
- > Simple installation with provided flange
