

Environmental Policy Statement

BGB is fully committed to minimising the environmental impact within our scope of operations for the design and manufacture & service of a comprehensive range of sliprings, current collecting devices, carbon brush gear, terminal blocks, moulded products, underwater lighting, monitoring & data transfer systems

In particular, we will achieve this through our leadership & commitment to:

- All aspects of the policy and operation will be reviewed on a regular basis at the Management Review Meeting to assure compliance with all relevant environmental legislation, legal and other requirements.
- Monitor and review the environmental impact of all activities, and endeavour to reduce our overall environmental impact and prevent pollution by using best practice.
- Involve employees in our environmental programme and provide necessary training to enable them to discharge their responsibilities.
- Sustain a programme of continual improvement in environmental performance, incorporating suitable measuring and monitoring mechanisms.
- Improve efficiency in energy and other resource usage and reduce waste by working to a framework for setting objectives and targets.
- Communicate with key suppliers, contractors and other persons working on our behalf in order to develop, maintain & sustain environmental best practice.

This policy is publicly available on request.
